INTERNATIONAL JOURNAL OF NON-LINEAR MECHANICS

Editor-in-Chief: WILLIAM A. NASH

VOLUME 27, 1992

Pergamon Press OXFORD · NEW YORK · SEOUL · TOKYO

INTERNATIONAL JOURNAL OF NON-LINEAR MECHANICS

Editor-in-Chief

WILLIAM A. NASH, *College of Engineering, University of Massachusetts, Amherst, MA 01003, U.S.A.*

Editors

C. S. HSU, *University of California, Berkeley, U.S.A.*
YU. A. MITROPOL'SKII, *Institute of Mathematics, Kiev, Ukraine*
J. L. NOWINSKI, *University of Delaware, Newark, U.S.A.*
R. M. ROSENBERG, *University of California, Berkeley, U.S.A.*

Contributing Editors

W. F. AMES (Applied mathematics), *School of Mathematics, Georgia Institute of Technology, Atlanta, GA 30332, U.S.A.*
P. HAGEDORN (Non-linear oscillations), *Institut für Mechanik, Technische Hochschule, Darmstadt, Hochschulestrasse 1, D-6110 Darmstadt, Federal Republic of Germany*
P. C. MULLER (Rigid body dynamics), *Safety Control Engineering, University of Wuppertal, Gausstr. 20, Postfach 10 01 27, D-5600 Wuppertal 1, Federal Republic of Germany*
J. N. REDDY (Plates, shells, variational/numerical methods), *Department of Mechanical Engineering, Texas A&M University, College Station, TX 77843-3123, U.S.A.*
K. R. RAJAGOPAL (Non-linear fluid phenomena), *Department of Mechanical Engineering, University of Pittsburgh, Pittsburgh, PA 15261, U.S.A.*
P. SPANOS (Random vibrations), *Brown School of Engineering, Rice University, P.O. Box 1892, Houston, TX 77251, U.S.A.*

Software Survey Editor

J. N. REDDY, *Department of Mechanical Engineering, Texas A&M University, College Station, TX 77843-3123, U.S.A.*

Editorial Advisory Board

H. A. ANTOSIEWICZ	*Los Angeles*	E. H. MANSFIELD	*Farnborough*
G. I. BARENBLATT	*Moscow*	A. MARZOLLO	*Udine*
B. BERNSTEIN	*Chicago*	L. S. D. MORLEY	*Uxbridge*
A. BLAQUIÈRE	*Paris*	L. OSTROVSKY	*Gorky*
S. BODNER	*Haifa*	G. H. REEB	*Strasbourg*
A. L. GOL'DENVEIZER	*Moscow*	M. ROSEAU	*Paris*
D. HUI	*New Orleans*	S. ZIEMBA	*Warsaw*
L. G. LOITSYANSKII	*St. Petersburg*	H. ZORSKI	*Warsaw*

Information for Contributors

Authors should send their contributions directly to the Contributing Editor, Editor, or Software Editor whose field of interest is most closely related to the subject matter.

Publishing and Advertising Offices

Pergamon Press Ltd, Headington Hill Hall, Oxford OX3 0BW, U.K. (Tel: (0865) 794141; Fax: (0865) 60285)
Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

Subscription Rates

Annual Institutional Subscription Rate (1993): £390.00 (U.S. $741.00). Sterling prices are definitive. U.S. dollar prices are quoted for convenience only, and are subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice. Published six times per annum in January, March, May, July, September and November.

Subscription enquiries from customers in North America should be sent to: Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A., and for the rest of the world to: Pergamon Press Ltd, Headington Hill Hall, Oxford OX3 0BW, U.K.

Back Issues

Back issues of all previously published volumes, in both hard copy and on microform, are available direct from Pergamon Press offices.

Application to mail at second-class postage rate is pending at RAHWAY NJ. Postmaster send address corrections to *International Journal of Non-Linear Mechanics*, c/o Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

VOLUME CONTENTS

Number 1

K. Sobczyk	1	Korteweg–de Vries solitons in a randomly varying medium
M. P. Reddy and J. N. Reddy	9	Finite-element analysis of flows of non-Newtonian fluids in three-dimensional enclosures
Q. Gu and J. N. Reddy	27	Non-linear analysis of free-edge effects in composite laminates subjected to axial loads
P. V. Ranganathan	43	Invariants of a certain non-linear N-dimensional dynamical system
R. K. Kapania and C. Byun	51	Vibrations of imperfect laminated panels under complex preloads
S. Caddemi	63	The global cracking laws for a finite-element model of no-tension material
M. Countryman and R. Kannan	75	Non-linear damped vibration of beams with periodic forcing
J. R. Red-Horse and P. D. Spanos	85	A generalization to stochastic averaging in random vibration
S. Das and B. Banerjee	103	Non-linear damped oscillations of moderately thick plates of arbitrary shape
G. Haller	113	Gyroscopic stability and its loss in systems with two essential coordinates
M. G. Henders and A. C. Soudack	129	"In-the-large" behaviour of an inverted pendulum with linear stabilization
	I	Software Survey Section

Number 2

R. J. Tait and D. B. Duncan	139	Motion of a mass on a non-linear elastic string
C. Currò, A. Donato and A. Ya. Povzner	149	Perturbation method for a generalized Burgers' equation
J. Suhardjo, B. F. Spencer Jr and M. K. Sain	157	Non-linear optimal control of a Duffing system
W. Szyszkowski and P. G. Glockner	173	Finite creep deformation and stability analysis of simple structures

K. V. Pramod and M. J. Vedan	197	Long-wave propagation in water with bottom discontinuity
K. Huseyin and R. Lin	203	A perturbation method for the analysis of vibrations and bifurcations associated with non-autonomous systems—I. Non-resonance case
R. Lin and K. Huseyin	219	A perturbation method for the analysis of vibrations and bifurcations associated with non-autonomous systems—II. Resonance case
N. C. Perkins	233	Modal interactions in the non-linear response of elastic cables under parametric/external excitation
G. Caviglia, A. Morro and B. Straughan	251	Thermoelasticity at cryogenic temperatures
K. Vajravelu and D. Rollins	265	Heat transfer in an electrically conducting fluid over a stretching surface
C. H. Kim and R. C. Batra	279	Effect of initial temperature on the initiation and growth of shear bands in a plain carbon steel
G. T. Karahalios	293	A note on a time-dependent flow from a stretching plane surface
B. Bernstein and R. R. Huilgol	299	An asymptotic expansion for the high-frequency superposed dynamic viscosity of the Doi–Edwards fluid
B. D. Vujanović	309	Conservation laws of rheo-linear dynamical systems with one- and two-degrees-of-freedom
	323	Announcements
	I	Software Survey Section

Number 3

W. W. Feng, T.-K. Hung and G.-L. Chang	329	Extension and torsion of hyperviscoelastic cylinders
A. A. Lokshin and M. Itskovitś	337	Exact solution to the reflection problem in a hereditary non-linear composite bar
H. R. Chaudhry and U. S. Gupta	341	Rotation of hyperelastic annular and solid disks of variable thickness
S. B. Yuste	347	"Cubication" of non-linear oscillators using the principle of harmonic balance
L. N. Virgin, R. H. Plaut and C.-C. Cheng	357	Prediction of escape from a potential well under harmonic excitation

R. X. Dai, Q. Dong and A. Z. Szeri	367	Flow of variable-viscosity fluid between eccentric rotating cylinders
S. Bhattacharyya and G. Nath	391	Unsteady swirling flow of a compressible fluid over an infinite disk with a magnetic field or suction
D. Rollins and L. Debnath	405	The Cauchy–Poisson waves in an inviscid rotating stratified liquid
J. A. Blume	413	On the form of the inverted stress–strain law for isotropic hyperelastic solids
He Lu-wu and Cheng Chang-jun	423	Non-linear buckled states of rectangular sandwich plates and their stabilities
Sun Ming-guang	437	Behaviour of a post-buckling riser vibrating due to effects of waves and current
J. G. Simmonds and P. Warne	447	Azimuthal shear of compressible or incompressible, non-linearly elastic polar orthotropic tubes of infinite extent
A. Muc	465	Buckling and post-buckling behaviour of laminated shallow spherical shells subjected to external pressure
Zhu Ruzeng	477	Distribution, stability, bifurcations and catastrophe of steady rotation of a symmetric heavy gyroscope with viscous-liquid-filled cavity
R. H. Rand, R. J. Kinsey and D. L. Mingori	489	Dynamics of spinup through resonance
J. A. Wickert	503	Non-linear vibration of a traveling tensioned beam
	I	Software Survey Section

Number 4

H. Cohen and G. P. Mac Sithigh	519	Symmetric and asymmetric roto-deformations of a symmetrical, isotropic, elastic pseudo-rigid body
H. W. Haslach Jr	527	Influence of adsorbed moisture on the elastic post-buckling behavior of columns made of non-linear hydrophilic polymers
J. M. Klosner, S. F. Haber and P. Voltz	547	Response of non-linear systems with parameter uncertainties
H. Pascal	565	Similarity solutions to some two-phase flows through porous media

P. G. L. Leach, R. Maartens and S. D. Maharaj	575	Self-similar solutions of the generalized Emden–Fowler equation
P. V. Ranganathan	583	Integrals of the Emden–Fowler equations
D. S. Djukic and T. M. Atanackovic	591	Extremum variational principle for an inextensible rotating rod
A. N. Kounadis	597	On the paradox of the destabilizing effect of damping in non-conservative systems
R. S. Alwar and M. C. Narasimhan	611	Axisymmetric non-linear analysis of laminated orthotropic annular spherical shells
W. Szyszkowski	623	Multimodal optimality criterion for maximum stability
M. Elżanowski and M. Epstein	635	The symmetry group of second-grade materials
D. C. Pamplona and L. Bevilacqua	639	Large deformations under axial force and moment loads of initially flat annular membranes
R. M. Gundersen	651	Modified dispersive equations
C. Rogers and P. Broadbridge	661	Sedimentation in a bounded column
Yun Tang	669	Non-linear stability of Rankine's vortex
W. W. Feng	675	A recurrence formula for viscoelastic constitutive equations
C. G. A. van der Beek	679	Analysis of a system of two weakly non-linear coupled harmonic oscillators arising from the field of wind-induced vibrations
S. J. Chowdhury and G. Ahmadi	705	A thermodynamically consistent rate-dependent model for turbulence—Part II. Computational results
	I	Software Survey Section

Number 5

L. S. Chien and A. N. Palazotto	719	Dynamic buckling of composite cylindrical panels with high-order transverse shears subjected to a transverse concentrated load
P. D. Spanos and M. G. Donley	735	Non-linear multi-degree-of-freedom system random vibration by equivalent statistical quadratization
R. M. Gundersen	749	Modified dispersion equations—II

H. Pascal	759	Similarity solutions to some unsteady flows of non-Newtonian fluids of power law behavior
F. Oliveri	773	On the equations of ideal-gas dynamics with a separable equation of state: Lie group analysis and substitution principles
M. Pakdemirli	785	The boundary layer equations of third-grade fluids
H. Wilson, K. Deb and D. Singh	795	Numerical accuracy in the integration of cable dynamics equations
H. G. Davies and Q. Liu	805	On the narrow-band random response distribution function of a non-linear oscillator
A. M. Waas	817	Initial postbuckling behavior of shear deformable symmetrically laminated beams
Y. B. Kim and S. T. Noah	833	Periodic response and crisis behavior for a system with piecewise-smooth non-linearities
A. Montanaro	845	Entropy-free theories for differential materials
A. F. Vakakis and R. H. Rand	861	Normal modes and global dynamics of a two-degree-of-freedom non-linear system—I. Low energies
A. F. Vakakis and R. H. Rand	875	Normal modes and global dynamics of a two-degree-of-freedom non-linear system—II. High energies
W. Zhang	889	A Krylov–Bogoliubov-type approximation for continuous-oscillation systems with damping non-linearities
	I	Software Survey Section

Number 6

H. J. Efinger and H. Hagenauer	905	Model computations for X-ray scattering by the Boltzmann equation
A. H. Kara and F. M. Mahomed	919	Equivalent Lagrangians and the solution of some classes of non-linear equations $\ddot{q} + p(t)\dot{q} + r(t)q = \mu\dot{q}^2q^{-1} + f(t)q^n$
H. I. Andersson, K. H. Bech and B. S. Dandapat	929	Magnetohydrodynamic flow of a power-law fluid over a stretching sheet
K. Vajravelu and J. Nayfeh	937	Hydromagnetic flow of a dusty fluid over a stretching sheet

K. R. Asfar	947	Effect of non-linearities in elastomeric material dampers on torsional vibration control
G. Q. Cai and Y. K. Lin	955	Response distribution of non-linear systems excited by non-Gaussian impulsive noise
G. Q. Cai, Y. K. Lin and I. Elishakoff	969	A new approximate solution technique for randomly excited non-linear oscillators—II
D. Karagiozova and N. Jones	981	Dynamic buckling of a simple elastic–plastic model under pulse loading
A. K. Ray, B. Banerjee and B. Bhattacharjee	1007	Large deflections of rhombic plates—a new approach
A. Marmo de Oliveira and W. Boruszewski	1015	A generalized variational principle for potentializable operators
G. Falsone	1025	Stochastic linearization of MDOF systems under parametric excitations
E. G. Guynn, O. O. Ochoa and W. L. Bradley	1039	Analysis of fiber microbuckling in thermoplastic composites
	I	Software Survey Section
